PROFESSIONAL EXPERIENCE

CARIBBEAN INSTITUTE FOR METEOROLOGY AND HYDROLOGY Feb 2023 – Present

Software Developer Intern (Dec 2023 - Present) St. James, Barbados

- Developed a web application over 4 months in a joint project with the Caribbean Development Bank that maps Intensity-Duration-Frequency (IDF) data across 19 Caribbean islands, providing engineers with accessible climate insights for infrastructure planning using Vue.js, Tailwind and Pocketbase.
- Created a Linux-based homomorphic encryption web application for hosting meteorological datasets using Flask, Bootstrap and MongoDB.
- Implemented quality assurance and control on an Excel climate impacts dataset of 6,000 records as part of a three person team over 2 months.
- Mentored two Yale University students to develop a disaster response application that improves the distribution of first aid and medical assistance during emergencies.
- Organized and led over six youth engagement events, such as career showcases and interactive VR demonstrations in meteorology, strengthening STEM awareness as a member of the outreach committee.

Caribbean Youth Livelihood Internship Programme (Feb 2023 - Nov 2023)

- Developed a permissioned blockchain system enabling secure storage and verification of digital academic certificates across 3 departments, benefiting approximately 80 participants and students.
- Assisted in the creation and implementation of a survey of 90 individuals using Kobo Toolbox to support the mushroom farmers' project conducted with the Inter-American Institute for Cooperation on Agriculture (IICA) Delegation of St. Lucia.

DIVE FAIR HELEN

Jun 2017 – Aug 2019

Webmaster & Tour Guide

Anse La Raye, St. Lucia

- Maintained the company's two websites and newsletter, managed social media accounts, and created poster graphics.
- Led kayaking tours from Marigot Bay to Roseau River, and snorkelling tours in the Anse Cochon and Soufriere Marine Reserves, educating guests about the environment and St. Lucia.
